Professional Summary

Computer Science undergraduate with strong problem-solving skills and experience in full-stack and Android development. Enthusiastic about AI integration, learning new technologies, and collaborating in diverse teams to build practical, impactful software solutions.

Education

Guru Nanak Dev Engineering College

Bachelor of Technology - Computer Science & Engineering

Aug 2023 – Present

8.55/10 CGPA

Sanatan Dharam Parcharak Senior Secondary School

Senior Secondary

2023

92.8%

Training & Experience

Android Development Trainee

ThinkNext Technologies Pvt. Ltd, Mohali, Punjab

June – July 2025

- Completed 4-week hands-on training in mobile app development using Dart and Flutter.
- Gained practical experience with Firebase for authentication and database management.
- Developed and deployed cross-platform app prototypes demonstrating Flutter skills and state management.

Projects

FinanceIQ — AI-Powered Financial Intelligence Platform

Next.js, TypeScript, Tailwind CSS, Recharts, Node.js, Express, PostgreSQL, FastAPI, scikit-learn

Live

- Developed a full-stack financial intelligence platform with secure authentication, transaction management, web dashboards, portfolio analysis, risk assessment, goal tracking, and real-time alerts.
- Integrated **Monte Carlo simulations** and AI/ML models for financial stress prediction, anomaly detection, optimal asset allocation, and actionable financial decision-making.

MedCoreAI — AI-Driven Diagnostic Dialogue System

Next.js, React, TypeScript, FastAPI, PyTorch, PostgreSQL, Prisma

Datasets: MedMNIST, custom symptom/report data

Github

- Built an AI-driven diagnostic dialogue system for **symptom-based triage**, follow-up questioning, medical image analysis, report understanding, chat history, and file uploads.
- Integrated **FastAPI**, **PyTorch**/MedMNIST image inference, NLP report analysis, translation, confidence-aware summaries, **home remedies**, lifestyle/diet guidance, and PDF-friendly reports.

NoteShelf — Local-First AI Notes Manager

Flutter, Dart, Provider, flutter_quill, Google ML Kit OCR, Node.js, OpenRouter API

GitHub

- Built a local-first notes app with **Flutter/Dart**, rich-text editing, folder/file management, local search, pinned/favourite notes, recycle-bin recovery, reminders, and responsive layouts.
- Integrated AI workflows for summaries, tags, cleanup, task extraction, title generation, OCR post-processing, voice transcript structuring, note-context chat, and **encrypted private folders**.

Technical Skills

Languages: Java, Python, C++, JavaScript, TypeScript, HTML, CSS

Developer Tools: VS Code, Git, GitHub, Android Studio, Postman, Figma

Technologies / Frameworks: Node.js, Express.js, React.js, Next.js, Bootstrap, Tailwind CSS, MongoDB, PostgreSQL, Firebase, Flutter

Leadership / Extracurricular

Executive Member — Training and Placement Cell, GNDEC Ludhiana

2025 – 2026

- Coordinating student placement activities and assisting in organizing recruitment drives.
